

09 — Metryki Jakości

[← Powrót do README](#) (./README.md) | [← Best Practices](#) (./08-best-practices.md) | [Następna: Zarządzanie Ryzykiem](#) → (./10-risk-management.md)

 Dashboard Metryk

Code Quality Metrics

Metryka	Obecna	Target	Narzędzie
Line coverage	~75% (est.)	≥85%	pytest-cov
Branch coverage	~60% (est.)	≥75%	pytest-cov
Cyclomatic complexity (avg)	~12 (est.)	<10	radon
Max function complexity	~30	<20	radon
Code duplication	~8% (est.)	<3%	jscpd / radon
Technical debt ratio	~15%	<10%	SonarQube (optional)
Type hint coverage	~40% (est.)	≥90%	mypy
Linting errors	>50 (est.)	0	ruff

Performance Metrics

Metryka	Obecna	Target	Źródło
Response time p50	~100ms	<50ms	Prometheus
Response time p95	~300ms	<200ms	Prometheus
Response time p99	~800ms	<500ms	Prometheus
Throughput	~500 req/s	>1000 req/s	Locust
Error rate	<1%	<0.1%	Prometheus
Feed sync time (avg)	~45s	<30s	Prometheus
Export 100k IOC	~20s	<10s	Benchmark

Security Metrics

Metryka	Obecna	Target	Narzędzie
Critical vulnerabilities	0	0	Trivy + Safety
High vulnerabilities	0	0	Trivy + Safety
ISO 27001 compliance	54%	100%	Audit checklist
OWASP Top 10 coverage	70%	100%	Manual audit
Secret exposure incidents	0	0	GitGuardian
Mean time to patch (critical)	N/A	<24h	Incident tracking

Business Metrics

Metryka	Obecna	Target	Jak mierzyć
System uptime	~99%	>99.9%	Prometheus uptime
Data freshness	~30 min	<5 min	last_fetch timestamp
Active IOC count	~150k	>200k	DB query
Feed count	10	≥15	Registry count
Export format count	17	≥20	Formatter registry
Time to add integration	~10 dni	≤2 dni	Per-adapter tracking

Developer Experience Metrics

Metryka	Obecna	Target	Jak mierzyć
CI build time	~8 min (est.)	<5 min	CI pipeline
Deploy frequency	~1/miesiąc	>1/tydzień	Deploy log
Lead time for changes	~2 tygodnie	<3 dni	PR open → deploy
Mean time to recovery	~1h	<30 min	Incident tracking
Change failure rate	~10%	<5%	Rollback count
PR review time	~2 dni	<1 dzień	GitHub/GitLab metrics

✓ Success Criteria per Milestone

M1.4.2 — Security

Kryterium	Metryka	Threshold
Auth working	Login success rate	>99%
CSRF protection	CSRF bypass attempts blocked	100%
Audit completeness	Admin operations logged	100%
Penetration test	Critical/High findings	0

M1.5.0 — Modularization

Kryterium	Metryka	Threshold
main.py size	LOC	<500
ops.py eliminated	Files created	≥3 nowe moduły
Regression	Existing tests passing	100%
New coverage	New module coverage	≥85%

M1.5.1 — Database

Kryterium	Metryka	Threshold
Schema alignment	Drift detection	0 differences
FK constraints	Missing FKs	0
PG tests	PG-specific test count	≥20

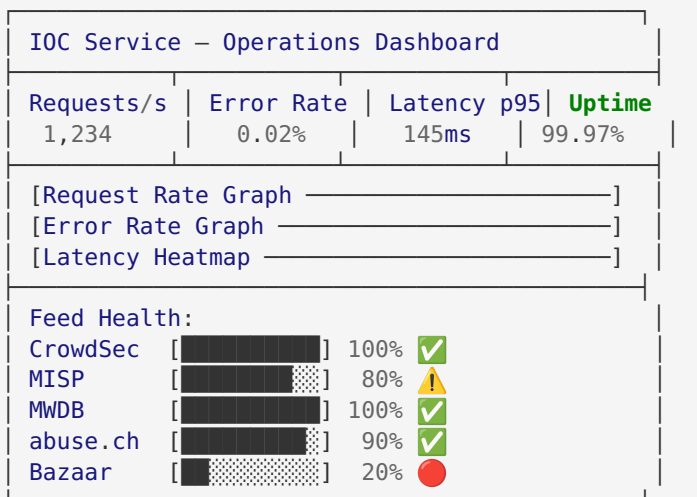

M1.6.1 — Adapters

Kryterium	Metryka	Threshold
Data parity	Old vs new adapter output	100% match
Contract tests	All adapters passing	100%
Integration time	New adapter (measured)	≤2 dni
Performance	Sync time regression	<10%
Old code removed	Dead connector code	0 LOC

Monitoring Dashboards Design

Dashboard 1: Operations Overview

Alerting Thresholds

Metryka	Warning	Critical	Akcja
Error rate	>1% (5min)	>5% (5min)	Page on-call
Latency p95	>300ms (10min)	>1s (5min)	Investigate
Feed down	1h no data	4h no data	Check feed
Circuit open	Any	>15min	Investigate source
Disk usage	>80%	>90%	Cleanup/expand
Memory	>75%	>90%	Scale/investigate
DB connections	>80% pool	>95% pool	Scale pool
